M062 - Mini-Fence-High-Voltage Generator

M062

Produces from a battery voltage of 9 - 12 V/DC a pulsating, weak high-tension of approx. 1000 Volt. For electrically operated fences for small animals, as thief-protection etc.
The two high voltage wires must be simultaneously connected to the bare feet, tongue, snout or other part of the small animal to induce electric shock.

Technical Data:
Operating voltage: 9 - 12 V/DC
Power consumption: ca. 10 mA
Output voltage: pulsating max. 1000 V / 0.5 joule
Pulse frequency: ca. 1 Hz (1 puls per second)
High-voltage display: LED
High-voltage cable length: max. 100 m (use paired wiring, wires not included)
Dimensions: ca. 72 x 50 x 42 mm (without fastening straps)
