M234 - Marten - Rat - Mouse Repeller

For indoor and outdoor use with aggressive ultrasound. Produces enormously loud, sinusoidal ultrasound, which martens, etc. find very annoying and the animals try to avoid if possible. These sounds are not audible to humans. The basic device is waterproof according to *IP65 and may also be mounted outside. The connected plug power supply has to be inserted into a socket in a dry place.

Technical Data:
Operating voltage: 230 V AC, 50 Hz, <1 W (plug power supply)
Cable length basic device - plug power supply: approx. 2 m
Frequency: approx. 22.5 - 28 kHz. Constantly varying and without interruption, in the most effective range not audible to humans
Acoustic pressure: up to 120 dB ±20%
Optical deterrence: Brightly flashing LED approx. every 2.5 sec.
Range of action: up to approx. 100 m² open area
Dimensions basic device: approx. 70 x 50 x 40 mm (without fastening straps + cable entry)
waterproof according to *IP65
Dimensions plug power supply (not waterproof): approx. 60 x 44 x 38 mm (without plug attachment)
