M202 - Lead-Acid Battery Activator / Refresher 12 V

Acts against the sedimentation of lead sulfate and thus increases the service life of the car battery. Lead sulfate is actively removed and the sedimentation is prevented, respectively, through strong and very short current pulses. With LED display.

Technical Data:

Operating voltage: approx. >11 - 16 V
 Automatic deactivation: approx. <11 V
 Max. pulsed current: approx. <100 A
 Duration pulsed current: approx. <100 µsec.
 Pulse sequence: approx. every 5 sec.
 Current consumption: approx. <0.2 mA
 Pulse display: LED
 May also be used for GEL batteries
 Dimensions: approx. 74 x 51 x 30 mm (without fastening straps)
