E014 - Experimental board dot/matrix grid

Experimental board in half euro measurement, double sided, flash-gold plated (better for soldering "lead-free").

Each contact point (hole) can optionally be connected to the adjacent strip trace with a solder bridge. On the board, these strip conductors run horizontally on one side and vertically on the other side. This allows simple connections between the individual holes.

FR4 Epoxid

Technical Data:

Double sided copper layer: approx. 35 μ m

Material: FR4 (Epoxid)

Hole distance: 2.54 mm

Hole: \varnothing approx. 1 mm

Thickness: approx. 1.5 mm

Dimensions: approx. 100 x 70 mm
