B181N - Paralyser 15.000 V

Produces high-voltage sparks of more than 15,000 V from a 9 V battery, which may even penetrate through cloth. Ideal as self-defence against wild animals, etc. or for physical experiments. The possession as a weapon is prohibited in many countries (e.g. in the EU). A deterrent effect is already achieved through the sparks flashing over and the sparking crackle!
Fitting case: G02B - 6 V Plastic Case Large approx. 123 x 72 x 39 mm
